Bring your friends and family, the event is open to all and free of charge.

Learn About Contact Lens Innovations

While not everyone can wear contact lenses, most people can. New innovations in lens materials and fabrication have greatly improved lens comfort and visual performance.

From nearsightedness and farsightedness to astigmatism and bifocal correction, most patients can experience clear comfortable vision with contact lenses.

If you are a candidate for one of these innovative contact lenses, we'll let you test drive them at **no cost or obligation.**

Free Lens Trials

All attendees will be given the chance to try contact lenses at no cost. Simply attend our seminar to learn about your options and we will determine which lens will serve your needs best.

After a quick health screening and prescription evaluation, we will provide you with trial soft contact lenses if they are right for you. We'll let you test drive the lenses to find out if you would like to pursue contact lens wear.

Unfortunately, custom RGP lenses are not included in this free trial.

Learn How To Save \$'s On Contact Lenses

Learn about all of the manufacturer programs to help you take advantage of all of these new technologies.

Save up to **\$130** on an annual supply of contact lenses and professional services by using these programs.
